ABOUT ME

Aspiring Web Developer Student passionate about creating dynamic and user-centric web experiences. Eager to master front-end and back-end technologies, driven by a strong desire to build innovative digital solutions. Committed to continuous learning and applying emerging web development principles to contribute effectively to a collaborative team environment

PROJECTS

Restaurant Menu Project

Responsive Restaurant Menu Webpage using HTML & CSS

- Developed a fully responsive and visually polished Restaurant Menu website using only HTML and CSS, showcasing strong foundational front-end skills.
- Crafted a clean, intuitive layout with well-organized menu sections to ensure a smooth user experience and easy readability.
- Designed and styled all UI components from scratch while maintaining cross-browser compatibility and a consistent brand aesthetic.
- Utilized semantic HTML for a solid structure and modern CSS techniques for professional, responsive styling.

Simple calculator

Web-Based Calculator Project

- Engineered a fully responsive and interactive web-based Calculator application from concept to deployment.
- Implemented core arithmetic functionalities addition, subtraction, multiplication, and division using clean and efficient JavaScript logic.
- Designed an intuitive and user-friendly interface with HTML and CSS, ensuring cross browser compatibility and a smooth user experience.
- Ensured accuracy and reliability by validating calculation logic through thorough testing across multiple input scenarios.
